Federal funds may be contracted through the Bureau of Indian Affairs under a program entitled "Tribal Government Development Program" to tribes lacking sufficient tribal funds to finance their tribal government in attaining tribal goals,

Our tribe's most pressing needs, to carry on an effective government, in order of priority, are: Priority number one: Travel and per diem

Priority number two: Construct a floating dock

Program Planner and Coordinator

On an attached sheet we have listed the funds available to the tribe this year. To help carry out the above listed governmental needs of the tribe, we have estimated the cost of each item on our list of priorities. Our tribal membership is 180. Our service population is 380. Our total land base, including individually and tribally owned, is 3,000 acres,

This resolution of our tribal governing body is an application for consideration under the Tribal Government Development Program (TGDP) for funds sufficient to meet our priority needs. We understand that if selected, funds will be made available through a Contract for the specific purposes requested. We authorize Calvin J. Peters to negotiate and sign a contract on behalf of the tribe, which authorization shall also include making necessary amendments and/or revisions, and renegotiating the contract the following fiscal year.

We will supply, to the best of our knowledge, other information which may be helpful to the Commissioner in making selections and allocating funds.

CERTIFICATION

The foregoing resolution was fully discussed at a duly called meeting and passed this 10th day of October, 1972 by a vote of 3 for and 0 against; further, that a quorum of the Governing Body was present.

Calvin J. Peters  
(Secretary)
